Do you feel there are goods and services the shop should provide but currently do not?

No

7 responses

None that I can think of

2 responses

i'm content with it as is tbh

No it's brilliant. Never been wanting once

Budget priced items

I'm sure they are limited by the space they have

They have everything! Amazing in such a small shop.

Not really, you have to take into a/c that these are volunteers and doing their very best to cover all aspects

Hot food and more snacks

Too many cakes, biscuits, crisps and expensive chocolates, may be more affordable chocolates or boxes of say celebration etc.

It has certainly covered our needs.

Excellent

I absolutely love this shop always a friendly face, It is the heart of this village

EVRI and similar parcel services

A selection of better wine alongside the current excellent budget choice

more affordable basic products

Not sure

We are limited by the floor / wall space that is available.

Yes

Very happy with everything. Sorry don't come so often as well supplied in Culworth!

Great selection, you wouldn't need to go outside the village to shop

More reduced fat / sugar options please. Also no products with palm oil unless sustainable. Please could each product be priced.

I have always found the shop very well stocked

More convenient produce, less high end produce. As much as it is a great variety

Possibly less luxury items and more day to day items that are reasonably priced. I also think that items should be priced.

No they have everything we need

Everyday essentials at sensible prices. I only shop there in emergencies as the prices are high compared to supermarkets and other convenience stores such as coop

Already a very wide range of goods and they will always try to get something different if asked

No I feel there are more than enough goods and services provided

Tinned raspberries

Too high end market. Need to cater for the more average wage earner

It can't be improved upon.

Range of products is very good and serves the community well. They cannot stock everything and make a grand effort.

Most goods are high premium when quite often value options are all that is needed

Happy with the range of goods

The occasional item is missing but overall the range is amazing.

Prices are an issue some items very expensive.

More every day products and less of the speciality / expensive stuff

Pretty good as is

None I can think of for a village shop

The shop offers a very comprehensive service. Some less expensive lines would be good. Also more prices on goods so customers do not have to ask how much an item is

Unsure - I feel the shop is generally over priced and therefore any other items or services would fit this model and therefore I would not used them.

Lacto free milk would be good
